We are in the market for all you can produce of good, hard pure Maple Sugar packed in standard new wooden sugar pails or sugar tubs.

We shall buy tin packages and second-hand wooden packages only at 2c less than the regular price, and the sugar must be boiled to at least 240° Fahrenheit. If it is boiled to a less degree of temperature, we will buy it only at a liberal discount as we are having a great deal of complaint from our customers on account of the sugar being put up so soft that syrup gathers on top and the sugar ferments. Ask our buyers for full instructions.
